

ABB Reportages

DANCE

FOR SENIORS

EPALE

The Erasmus platform communicates

EPALE is the Erasmus sharing platform.

It communicates Erasmus events
by highlighting the actions and philosophies behind the projects.

Today, it invites us to look to the future...

*The future isn't something we predict—it's something we practice.
Join EPALE podcast host Heini Huhtinen and futures literacy expert Lena Tinkers as they
explore how thinking in "multiples" opens up possibilities, challenges assumptions, and
makes future-thinking more inclusive and participatory.*

ABB Reportages is proud to be part of this dynamic

and to be invited to present its project

‘Dancing with Seniors’

during the Erasmus Day, which will take place in Besançon on 6th November 2025.

ABB Reportages, who has benefited from a small-scale Erasmus project, will show how this support has helped to demonstrate that Music, Dance and Empathy are revolutionising the care of the elderly.

It is, indeed, Erasmus + that enabled ABB Reportages to forge links with GAARD (Greek Association of Alzheimer's Disease and Related Disorders) and to demonstrate that tango in Greece is possible and dynamic!

Click on the picture to watch the video

and that Greek dance in France is also possible and brings people together and spreads joy!

[ABB Reportages](#) is now aiming at proving that, beyond Tango and Sirtaki, every dance is a vector for bringing together seniors and carers, families and volunteers.

Let's get started on this collaborative project, and welcome to anyone who wants to join!

In Dijon,
the [Inserm CAPS U1093](#) laboratory
the [Université Bourgogne-Europe](#),
and its Sports Department ([UFR STAPS](#)),

are analysing this through a doctoral thesis project and a multicentre study...

Ready to get started?

With the support of

AG2R LA MONDIALE

with the support of [Agirc-Arrco](#).

**Co-funded by
the European Union**
