DANCING

WITH SENIORS

GREEK DANCE

A Memory of the Future

After 15 years of tango, one had to imagine it...

The idea was to bring Greek dance to the elderly and seniors of France, and it was approved by [Erasmus +](#), which agreed to support a joint project between [ABB Reportages](#) and the [GAADRD](#) in Thessaloniki.

They made the right decision - the idea is now supported by the [Inserm CAPS U1093](#) laboratory and the Sports Department ([UFR STAPS](#)) of the University of Burgundy ([Université Bourgogne-Europe](#)),

which, have launched

a doctoral thesis with [Jessica Bazin](#);
and a multicentre study with [Nour Keyrouz](#).

Their sights are set on
Aubervilliers, Messigny-et-Vantoux, Beaulieu, Alésia and Dijon,
all of which are locations who have adopted the project!

On Sunday, the Greek team will arrive in France for the fifth time, to continue teaching teachers, dancers, musicians and care assistants, whose new skills are immediately passed on to the elderly.

Starting on Monday, ABB Reportages will take you

**on a five-stage journey on social media
to the five places that have been won over by Greek dance.**

There will be no words, or very few, just to share
the incredible revolution brought about by the tunes and steps from Thessaloniki.

Thanks to the support of

with the support of [Agirc-Arrco](#).
